
Abortion data updates for 2014-2018

17 June 2019

Wm. Robert Johnston

Abstract: This document updates the abortion data in the Sacred Accounting Tables in the *Abortion Worldwide Report (Informe Mundial del Aborto)* with new figures for 2014-2018. Reported and estimated abortions for the 110 countries and other areas from 1921 to 2018 are 1,051,962,000, with 11,545,000 estimated for 2018.

The *Abortion Worldwide Report (AWR) [Informe Mundial del Aborto (IMA)]* (Jacobson and Johnston, 2018) provides reported and estimated abortions by year for 100 countries and other areas through 2015. Table 1 below provides updates to these figures for 2014-2018. These figures supersede the updates in AWR Working Paper 21 [WP21] (Johnston, 2018b). Note that some regions of controversial status are listed; see AWR/IMA pp. 90-92 or Johnston (2014) for discussion.

Ten countries and territories are newly added to the tabulation since publication of the AWR/IMA: Anguilla, Argentina, Brazil, Colombia, Ecuador, Luxembourg, Panama Canal Zone, Paraguay, Saint Helena, and Uruguay. Seven of these countries/territories are in mainland Latin America with reported figures prior to 2014 available in AWR WP22 (Johnston, 2018c). Table 2 provides figures prior to 2014 for Anguilla, Luxembourg, and Saint Helena, plus updated figures for Austria and some Latin American countries. All updated figures prior to 2014 are reflected in the Table 1 totals for all years.

Updated estimates follow the same methodologies described in AWR/IMA, generally extrapolated using the average of annual percentage changes for the last five years. Incomplete reporting is a known issue for many developing countries, including listed countries of Latin America.

As in the AWR/IMA, figures for countries emerging from the breakup of Czechoslovakia, the U.S.S.R., and Yugoslavia include known figures for the corresponding republics/regions prior to those breakups. Thus 1921-2018 totals permit conclusions on demographic impacts to these modern countries. Consistent with this approach, totals for Germany here also include figures for East Germany prior to reunification. Total figures for Europe are adjusted to avoid double counting.

Figures in Table 1 for Guernsey, Ireland, Isle of Man, Jersey, and Malta include abortions occurring abroad (in Netherlands and the United Kingdom) as they represent most known abortions for these

countries and territories. Figures for Netherlands and the United Kingdom include these abortions. Total figures for Europe are adjusted to avoid double counting.

Many country-specific data issues are discussed in AWR/IMA, but a few updated comments are warranted. Estimates for 2015-2018 for the United States are from AWR WP26 (Johnston, 2018d). Data for India are for officially reported induced abortions. Underreporting is likely significant for India, though the recently published figures by Singh et al. (2018) warrant investigation. Estimates for Austria have been revised but are still known to be significantly incomplete (Johnston, 2018a).

Total worldwide known or reliably estimated abortions in 2018 are 11,545,000, and total abortions from 1921 to 2018 are estimated at 1,051,962,000.

Table 1: Abortions by year and country, 2014-2018, updates with italics for estimates, parenthesis for less constrained estimates, and grey for figures unchanged from the 2018 AWR/IMA. Countries identified with (*) are additional to those listed in the 2018 AWR/IMA.

Notes (#):

- Total abortions for Czechoslovakia include 3,651,541 abortions also included in the totals for the Czech Republic and Slovakia.
- Total abortions for Germany include 1,820,400 abortions included in the totals for East Germany.
- Total abortions for the U.S.S.R. include 256,020,757 abortions also included in the totals for Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan.
- Total abortions for Yugoslavia include 9,398,525 abortions also included in the totals for Bosnia and Herzegovina, Croatia, Kosovo, Montenegro, North Macedonia, Serbia, and Slovenia.
